Introduction

This book is an attempt to learn the art of "Creativity".

In this book we will try to define "New Theory of Relativity", in 1 page!

New Theory of Relativity - The Art of Creativity

New Theory of Co-Existence (Relativity):

Almost everything can have different meaning to different people, though the underlying fact remains the same i.e. say from one's point of view something can be 'applicable' however from someone else's point of view it might 'not be applicable'. Let's take one very simple example. While it is day in few eastern countries; at the same time it is night for few western countries and vice-versa. However the 'time' itself as an eternal fact of nature is intact. Thus the eternal time factor is neutral, indifferent and independent of such contradicting features.

Similarly in majority we can apply this theory of co-existence (relativity) to many things in life; though the underlying facts as defined by nature remain unchanged e.g. Happiness and Sorrow are applicable to material forms of lives. However we, the eternal souls can win freedom from the slavery of material pleasures and pains as applicable to material forms of temporary lives by achieving Salvation / Moksha / Nirvana.

We all vary in age, gender, looks, color, caste, religion, nationality, social/financial status, occupation etc. but the Sun and Moon are common for all forms of lives across the globe.

There are four main aspects behind the "New Theory of Co-Existence (Relativity)". They are:

(1) Substance (2) Place (3) Time (4) Characteristics / Attributes

The laws of nature always remain true, absolute, universal and applicable in totality; though one may choose to accept it or not but that does not change them. The principles of nature are eternal and infinite. The applications of a fact are relative in nature and not the fact itself!

There are many eternal facts of life which are either white or black as defined by nature though we humans get confused by mixing these facts and calling them gray. That is where the problem lies, we all expect everything to change and/or function and/or exist as per our beliefs, opinions and views. We come across so many differences in beliefs/opinions/views throughout our lives in almost everything we think, speak and do.

Let's take one very critical example of the thought of "God". We all expect, advice and appreciate unity across the world by believing that the God is one for all i.e. Nature and it is we humans who have segregated ourselves across various religions having beliefs in different names and/or forms of God.

However we again contradict our own positive values by continuing to believe that "There is only one God for all; however the term 'one' stands for the one in which I believe!" Does it help to ensure unity, peace and happiness across the globe?

The only reason for the same is that we make optimum usage of our misguided IQ (Intelligence Quotient) and biased EQ (Emotional Quotient) but what we lack is the application of SQ (Spiritual Quotient) i.e. power of spiritual intelligence of our brain.

Let's think creatively and find the purpose of our existence as humans!

Thank You

I have tried to discuss the art of Creativity by attempting to define a New Theory of Relativity with a larger view and in a creative way but ensuring that the whole discussion gets covered in just '1 page' to make the best out of it in the minimum possible investment of our time!
