

The
ECONOMY
that Never Fails
in 1 Page

Chirag Saiya

Introduction

This book is an attempt to throw some light on few key areas which can explain the cause and the remedies for the financial crisis witnessed by so called materially advanced and intellectually grown economies across the globe in the beginning of 21st Century!

Not only that, the fundamentals for a real economy as mentioned in this one pager book will also help us to learn the true values to give birth to a wonderful economy which can assure right balance, complete happiness and ultimate peace for each and everyone across the globe whether a human being or any other creature; obviously along with infinite success and growth as well!

However, we can not change the laws of NATURE which has its own role to play as per the TIME. But let's at least try to manage ourselves in a better way while moving ahead as per the Nature of Time.

The ECONOMY - Let's make it REAL

- The truth lies in **BARTER ECONOMY** i.e. a commercial trade based on exchange of natural resources into usable form including intangible assets like knowledge for mutual requirement where both the parties to trade act as buyer as well as seller at the same time and hence ensuring the balancing of nature. Thus currency can never be an asset on its own independently unless issued only after maintaining the pool of any relational and mutual underlying tangible natural resources reserve. It is an indirect way of running the barter economy only via currency just to facilitate the commercial trade.
- The trade value should be restricted to the extent of **ACTUAL MONEY** transacted e.g. Margin Trading system into shares market is against the interest of economy and pricing.
- The regulations relating to **INVESTMENTS** into financial securities etc. should ensure actual investment motive and not speculation motive e.g. shares market and properties etc.
- **LOAN** funding should be real need based and not to be based on over consumption motive.
- Commercial growth based on conversion of **LOANS** into **ASSETS** pool for their further re-selling is self-destructive because it acts as money multiplier without natural balancing.
- **DERIVATIVE** products should be based on insurance motive and not speculation motive.
- The economic transactions where **BOTH PARTIES GAIN** are the only real transactions. Where one can make profit only by loss of others is destruction and not growth.
- The commercial transactions done without **ACTUAL EXCHANGE** of goods or services are illusory and not useful in anyway. In fact they harm economic development and pricing.
- Any **PRICING** should be based only on the actual demand and supply parameters based on actual exchange of the goods or services for their real consumption needs.
- We can have material growth and true success along with real peace and happiness for all only if Primary Sector i.e. **HERBAL AGRICULTURE** is given maximum care and attention followed by Secondary Sector i.e. Industries and Tertiary Sector i.e. Services.
- Economic fundamentals if decided on Socialist view i.e. equitable distribution of natural resources and wealth among each human being and other living creatures **ACROSS THE GLOBE AS A WHOLE** is the only real and fundamentally strong economy. Thus the concentration and over consumption of natural resources and wealth among a few at the cost of others as followed by Capitalist view is against one's own self-interest ultimately.
- The economy which is based on **SPIRITUAL** values can never fail. Any economy defined and based only on **MATERIALISTIC** approach can never sustain. It can only fail.
- To serve others in a **SELFLESS** state of **MIND** is the only solution to ensure self-interest.
- **SIMPLICITY** is constructive economy. **EXTREME MATERIALISM** is a time bomb!

Thank You

I have tried to throw some light on the true values of a real economy which can ensure infinite growth, success, peace and happiness for all in just '1 page' but ensuring that the best of them are shared to benefit the world at large in minimum possible investment of our time!
